

ASSIGNMENT -4

DOCKER DESKTOP (Kubernetes)

Question 1:

Pull an image from docker hub and run it on docker playground.

docker pull registry

docker run -d -p 9000:9000 --privileged -v
/var/run/docker.sock:/var/run/docker.sock registry

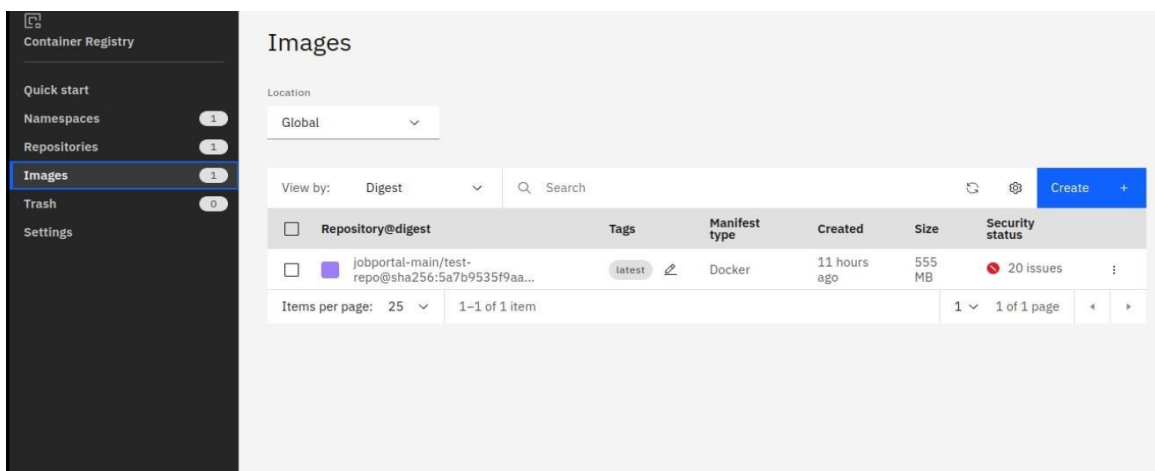

The screenshot displays the Docker Playground interface. On the left, a sidebar shows a timer at 03:38:03, a 'CLOSE SESSION' button, and a list of instances with one instance named 'node1' at IP 192.168.0.28. The main panel shows details for instance 'cdiuhe3_cdiuofm0qau000fq8s20' with IP 192.168.0.28, 2.29% memory usage, and 0.68% CPU usage. Below this, an SSH command is provided: 'ssh ip172-18-0-8-cdiuhke3tccg008jlpdg@direct.labs.play-wit content_copy'. A terminal window at the bottom shows the execution of 'docker pull registry' and 'docker run -d -p 9000:9000 --privileged -v /var/run/docker.sock:/var/run/docker.sock registry'. The terminal output shows the pull of the 'registry:latest' image and the successful execution of the container. An 'Activate Windows' watermark is visible in the bottom right corner of the terminal area.

```
# The FWD team. #
#####
(node1) (local) root@192.168.0.28 ~
$ docker pull registry
Using default tag: latest
latest: Pulling from library/registry

```

Question 2:

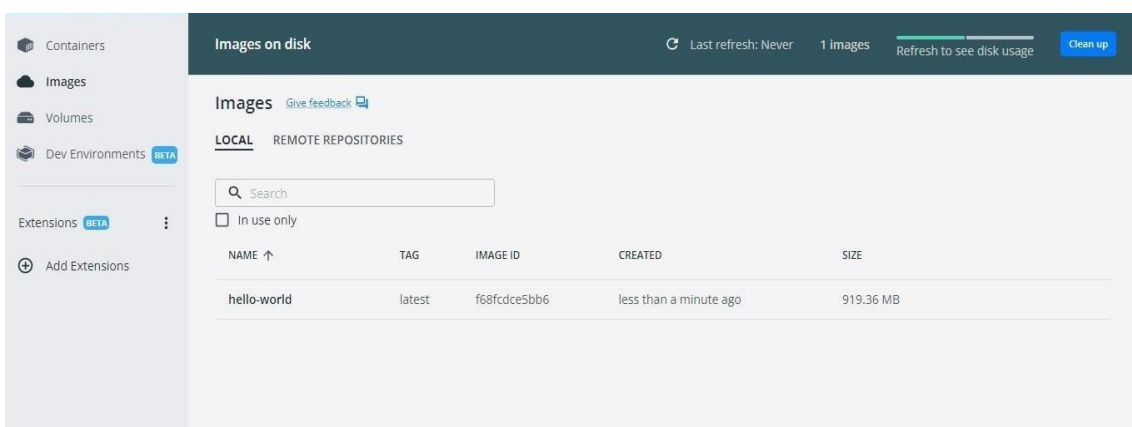

Create a docker file for the job portal app or hello world app and deploy it into docker desktop app.

```
FROM python:3.8
WORKDIR /app
ADD ./app
COPY requirements.txt /app
RUN python3 -m pip install -r requirements.txt
EXPOSE 5000
CMD["python","app.py"]
```

Question 3:

Create an IBM container registry and deploy helloworld app or job portalapp.

Question 4:

Create a kubernetes cluster in IBM cloud and deploy helloworld image or job portal image and also expose the same app to run in nodeport.

```
apiVersion:
v1kind:
Service
metadata:
  name: hello-world-
deploymentspec:
  ports:
  - port: 5000
    targetPort:
5000selector: app:
  hello-world
---
apiVersion:
apps/v1kind:
Deployment
metadata:
  name: hello-world-
deploymentspec:
  replic
as: 1
select
or:
  matchLabels: app:
    hello-
worldtemplate:
  meta
  da
  ta
  :
  la
  be
  ls
  :
    app: hello-
worldspec:
  containers:
  - name: hello-world
    image: au.icr.io/hello-world-app/hello-
worldimagePullPolicy: Always
  ports:
  - containerPort: 5000
```
